INITIAL REPORT November 27, 2022 LAST UPDATED November 15, 2023

2.5% Senior Convertible Notes; Recommendation: Withdrawn

Price: 27 FINRA link

FISKER INC.

Fisker Inc. (FSR) is an American electric vehicle (EV) company founded by Henrik Fisker and his wife Geeta Gupta-Fisker. The company is in its first production and sales year for the Ocean and has plans to launch the Pear. Currently, Magna Styr, an automobile manufacturer in Austria is contracted to build the Ocean. As a result Fisker will only need to invest a fraction of the capital required by companies making their own production facilities. Magna also builds cars for BMW, Mercedes, and Toyota. Fisker's business model reduces the capital required by as much as 80%.

However, after reporting 3rd quarter results the company seems to be in disarray. After initially predicting over 42,000 cars produced for 2023 the company produced less than 6,000 (year to date) and encountered delivery problems with only 1100 cars out of 4700 produced in the third quarter being delivered. Fisker was still predicting as many as 23,000 units produced for 2023 at the end of second quarter.

Since the company is not generating confidence with the operation this could cause an additional problem with raising the necessary capital needed to reach profitability. We estimate Fisker will need as much as \$1.5 billion in additional capital to reach break even. Currently Fisker has over \$1.2 billion in convertible debt and \$600 million in cash.

So, initially we had recommended the convertible notes but are withdrawing the recommendation due to uncertainty in the operation. Management did not raise the estimated capital and some sort of reserve before beginning production. This may easily improve in the next few quarters, but we estimate that Fisker will also need to be producing 22,000 cars per quarter in order break even on EBITDA.

Investor Relations

2023 estimates	
Production units	12,000
ASP	\$60,000
Gross Profit	\$51 mm
Operating income	-\$349 mm
Cash Flow	-\$539 mm
2024 estimates	
Production units	26,000
ASP	\$60,000
Gross Profit	\$174 mm
Cash Flow	-\$756 mm

Disclosures

*EV Comparisons: Enterprise Values Source: Yahoo Finance, 2023 production estimates are highly speculative and the estimates are provided by Broxton. Previous reports are available upon request. Smart Yield Fund targets a mix of different security classes that contain the risk of loss. Investors should carefully consider the Fund's investment objectives and risk factors before investing. Investing involves risk, including possible loss of principal. Investors should consider the loss of principle and targeted returns are not guaranteed. Individual investors in Smart Yield are generally required to be accredited investors. Smart Yield is a fund operated through individual accounts creating the composite. Smart Yield Fund is a new product with an inception date of September 30, 2020, and as such does not have historical data. Asset Mix Projections on page 2 and 6, Smart Yield Portfolio Metrics on page 5 are estimated or targets of the fund. Asset class mix and targets may change based on the direction of the managers. Portfolio allocation projected annual return and beta assumption for each asset class on pages 7-10 are estimated. Beta for the fund and each asset class is estimated versus the S&P 500. The average beta for the entire fund is projected to be .32. Beta is a measure of the fund's volatility in relation to S&P 500 Index. This index has a beta of 1.0. The fund targets a total gross return before fees and expenses of 9.24%. The fund projects a blended return based on income securities and capital gains. Smart Yield attempts to continuously improve the value of investment portfolios by investing in corporate bonds, convertible bonds, other types of bonds (investment grade and sub-investment grade, [which may also have limited liquidity]), dividend paying equities, non-dividend paying equities, ETFs, including leveraged ETFs, and other securities. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. All securities types mentioned in this brochure have the risk of loss. Long term strategies purchase securities which are underpriced according to our appraisal methodologies. Broxton uses regression analysis to obtain an average appraisal value for an individual company and places a priority on the securities of companies with improving financial performance and or additional catalysts that provide for increases in earnings and valuation. We use financial modeling, technical analysis, proprietary and third-party research. Smart Yield does not have any capitalization (market size), sector or industry allocation mandates. Asset class allocation percentages may be changed without notice. Broxton deploys technical analysis and momentum as indicators of movement for shorter term strategies, that may not involve deep fundamental analysis. Shorting (selling and then buying) of securities can be used for hedging and as a long term or short-term strategy. We exit positions in accordance with our discipline, this includes when valuation targets are clearly exceeded, or financial performance falls below our projections. Since Smart Yield returns will be calculated using a composite of accounts, the average account will not match the composite return and the return could be higher or lower. Broxton offers Smart Yield for other investment managers. Any commentary is solely the opinion of the Broxton Capital Advisors. It refers to securities we hold in our portfolio and sometimes ones we are considering but does not represent a complete list of positions held at Broxton Capital Advisors. A complete list covering the last twelve months will be furnished upon request. Price targets are mentioned for information purposes only. Nothing contained herein constitutes a recommendation to purchase or sell securities at any designated price or time. Targeted performance does not guarantee future results. Additional disclosures are included on broxtoncapital.com including in form ADV. SEC Rule 206(4)-1 disclosure: this report is approved by the CCO of Broxton Capital. Individuals should consider the inherent risks before investing and this report should not be construed as advice tailored to an individual's investment criteria or objectives. Important Disclosure: In the normal course of our communications or reports, we analyze, review and discuss current, past and possible future securities holdings. In the case of any security reviewed by us, it should not be assumed that recommendations made in the future will be profitable or will equal the performance of any profitable security that is reviewed or discussed. On request we provide a list of all investment recommendations made by the firm over the last twelve months. Also, from time-to-time we may also discuss and display, charts, graphs, formulas which are not intended to be used by themselves to determine which securities to buy or sell, or when to buy or sell them. Such charts and graphs offer limited information and should not be used on their own to make investment decisions.
